## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1, 2, 4, 5, 7, 8, and 12-16 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest some of the limitations found in independent claims 1 and 14. With respect to independent claim 1, the prior art of record fails to teach or suggest a beam splitter configured to transmit part of the monomode laser beam toward the multimode doped fiber and a reflected part of the monomode laser beam toward the holographic mode conversion device, as is claimed in independent claim 1. With respect to independent claim 14, the prior art of record fails to teach or suggest spatial mode conversion means in series with the optical cavity, the spatial mode conversion means configured to convert a multimode beam into a monomode beam. Specifically, the "spatial mode conversion means" encompasses the structure recited in the specification, such as the holographic spatial mode conversion element (3) and the optical splitter (4) placed between the monomode laser oscillator (2) and the first end of the multimode doped fiber (1). Therefore, independent claims 1 and 14, as well as all dependent claims, are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
